Introduction to 1Y0-A20 Exam on Basic Administration for XenApp 6.5

The Citrix 1Y0-A20 exam preparation guide is designed to provide candidates with necessary information about the CCA - XenApp 6 exam. It includes exam summary, sample questions, practice test, objectives and ways to interpret the exam objectives to enable candidates to assess the types of questions-answers that may be asked during the Citrix Certified Administrator for XenApp 6 (CCA - XenApp 6) exam.

It is recommended for all the candidates to refer the 1Y0-A20 objectives and sample questions provided in this preparation guide. The Citrix CCA - XenApp 6 certification is mainly targeted to the candidates who want to build their career in Virtualization domain and demonstrate their expertise. We suggest you to use practice exam listed in this cert guide to get used to with exam environment and identify the knowledge areas where you need more work prior to taking the actual Basic Administration for XenApp 6.5 exam.

Citrix 1Y0-A20 Certification Details:

Exam Name	Basic Administration for XenApp 6.5 (CCA - XenApp 6)
Exam Code	1Y0-A20
Exam Price	\$150 USD
Duration	90 minutes
Number of Questions	68
Passing Score	61%
Recommended Training / Books	CXA-206: Citrix XenApp 6.5 Administration
Schedule Exam	<u>PEARSON VUE</u>
Sample Questions	Citrix 1Y0-A20 Sample Questions
Recommended Practice	Citrix Certified Administrator for XenApp 6 (CCA - XenApp 6) Practice Test

Citrix 1Y0-A20 Exam Syllabus:

Section	Weight	Objectives
Understanding the Citrix Architecture	10%	<ul style="list-style-type: none"> - Given stated requirements, identify the steps to create and elect a dedicated controller - Recommend the type of data store to use to meet given requirements. - Identify the appropriate service(s) to enable and protocol(s) and/or port number(s) to use, given a description of an environment. - Determine when it is appropriate to configure worker groups. - Given a description of the Web Interface architecture in a specific environment, recommend or justify a location for the Web Interface.
Licensing and Installing XenApp	5%	<ul style="list-style-type: none"> - Given a list of installation methods and a description of an environment that is using the XenApp Server Role Manager for installation, identify the most appropriate way to complete the installation to meet the needs of the environment - Based on stated requirements, determine when it is appropriate to make a server a controller or a worker - Identify the steps to license a given XenApp farm.
Configuring XenApp Sessions	12%	<ul style="list-style-type: none"> - Identify the steps to configure HDX technologies to meet the requirements of a given scenario. - Given a description of an environment, identify the differences of client side and server side rendering - Recommend which plug-ins to implement on endpoint devices to meet given requirements - Identify the most appropriate method to deliver a specific client plug-in to meet given requirements. - Anticipate what will happen when smooth roaming is enabled. - Given a scenario describing an issue with session sharing, identify possible causes. - Given a scenario depicting the need for users to reconnect to disconnected sessions, determine how to configure Logon Control to meet this requirement. - Determine when it is appropriate to configure Session Linger.

Section	Weight	Objectives
Configuring XenApp Policies	10%	<ul style="list-style-type: none"> - Determine how to ascertain the resultant policy behavior for a specific user or user group. - Select the appropriate steps to configure Health Monitoring and Recovery to meet specified requirements. - Identify the steps to configure HDX optimization setting(s) to meet specified requirements. - Given a scenario, determine when to configure a policy to randomize server reboots and disable logons for a period of time. - Determine the appropriate policy type to create and identify how to filter that policy to meet specified requirements.
Publishing Applications and Content	12%	<ul style="list-style-type: none"> - Identify the steps required to use a specific application delivery method for a given requirement. - Determine how to profile a package, including linking profiles. - Based on a scenario, identify how to publish an installed application. - Given a scenario, determine how to publish a streaming application to a client. - Given a scenario and list of requirements, determine how to publish a streaming application. - Based on a scenario, determine when to configure host (server) to client and client to host (server) content re-direction.
Using Commands, Reports, Profiles, and Delegation	7%	<ul style="list-style-type: none"> - Given a scenario and/or requirements, determine how to configure delegated administrator accounts. - Given a scenario, specify how to configure configuration logging or access log configuration changes. - Given a scenario, identify which command to use to provide the information the administrator needs. - Based on a scenario, identify which type of profile to implement.

Section	Weight	Objectives
Monitoring and Managing Performance and Load	10%	<ul style="list-style-type: none"> - Given a scenario, determine when to use default, advanced or custom load evaluator. - Given a scenario, specify when to assign a load evaluator to an application or server using worker groups. - Specify when to configure load balancing policies to meet the requirements of a given scenario.
Configuring Printing	9%	<ul style="list-style-type: none"> - Based on a scenario, determine which printer driver to use. - Based on requirements, identify the steps to implement the session printers policy. - Specify how to install and add printer drivers to meet given requirements. - Determine how to configure printing policies to meet the requirements of a given scenario.
Enabling and Securing Web Access to Published Applications and Content	12%	<ul style="list-style-type: none"> - Determine the appropriate failover options to configure within the Web Interface console to meet requirements. - Determine how to configure secure access based on stated requirements. - Recommend which type of Web Interface site to configure to meet requirements. - Identify which configurations are needed in Web Interface sites to meet requirements. - Identify the steps to configure one Web Interface to work with multiple farms. - Identify when to add multiple farms to a Web Interface configuration. - Determine how to configure authentication for Web Interface.

Section	Weight	Objectives
Troubleshooting	13%	<ul style="list-style-type: none"> - Select acceptable steps to troubleshoot issues related to IMA. - Given a scenario describing a load balancing issue, identify a possible cause of the issue. - Identify how to troubleshoot both Citrix and Microsoft licensing issue. - Given a scenario, select the steps to resolve a given session issue. - Given a scenario describing a Web Interface issue, select the steps to troubleshoot the issue. - Given a scenario describing a common print issue, select the steps to troubleshoot the issue. - Given a scenario describing an issue with client performance, identify the steps to troubleshoot the issue.

Recommended Knowledge and Skills for CCA XenApp:

Item	Description
Experience with Microsoft Windows Server 2008 R2 including but not limited to:	<ul style="list-style-type: none"> - Configuring operating system options - Understanding Terminal Services policies and profiles - Using Active Directory <ol style="list-style-type: none"> 1. Creating users/managing permissions and administrator rights 2. Creating and modifying Active Directory group policies - Understanding the various roles of a Windows server
Experience with and knowledge of system administration skills, including but not limited to:	<ul style="list-style-type: none"> - Understanding of: <ol style="list-style-type: none"> 1. How data is transferred across a network 2. Firewall concepts 3. Email administration and account creation - Creating shares and giving access to shared folders/files - Understanding basic database terminology and requirements

Recommended Product Experience for CCA XenApp:

Item
Installing and managing a XenApp
Configuring XenApp sessions
Configuring XenApp policies
Publishing applications and content
Monitoring and managing performance and load
Configuring printing
Enabling and securing web access to published applications and content
Troubleshooting

1Y0-A20 Sample Questions:

01. Which statement correctly describes Citrix universal printing?

- a) Citrix universal printing is a solution that will allow a XenApp server to act as a print server.
- b) Citrix universal printing is a solution that allows printing without the need to install a local printer.
- c) Citrix universal printing is a solution that will allow printing regardless of the operating system of the client device.
- d) Citrix universal printing is a solution that allows users to print whether or not the correct print drivers are installed

02. Select the correct order in which policies are processed and applied.

- a) Domain GPOs, Local GPOs, IMA-based policies, OU GPOs, Site GPOs
- b) IMA-based policies, OU GPOs, Local GPOs, Site GPOs, Domain GPOs
- c) Local GPOs, IMA-based policies, Site GPOs, Domain GPOs, OU GPOs
- d) OU GPOs, Local GPOs, IMA-based policies, Site GPOs, Domain GPOs
- e) Site GPOs, Domain GPOs, Local GPOs, OU GPOs, IMA-based policies

03. An administrator would need to add multiple farms to a Web Interface configuration to _____.

- a) protect against IMA failure
- b) load balance the XML Service
- c) consolidate applications from multiple farms
- d) increase the performance of application enumeration
- e) provide a seamless migration path across farm upgrades

04. What is the proper extension for a roaming profile in the template location for Citrix Profile Management?

- a) .DAT
- b) .LOG

- c) .MAN
- d) .PROFILE

05. How can an administrator remove or edit driver names in the compatibility list?

- a) Use a Citrix Policy
- b) Use the WTSUPRN.INF file
- c) Use Windows Print Management
- d) Use the ICA Client Printer Configuration tool

06. Which two database platforms are supported for the data store?

(Choose two.)

- a) Oracle
- b) IBM DB2
- c) Microsoft Access
- d) Microsoft SQL Server

07. For which scenario would the Default load evaluator be most appropriate for the environment?

- a) When CPU utilization reaches 90 percent; a full load should be reported
- b) When memory usage reaches 90 percent, a full load should be reported
- c) When the server user load reaches a maximum of 100. a full load should be reported
- d) When the application user load reaches a maximum of 100. a full load should be reported

08. An administrator can adjust load evaluator properties _____.

- a) At any time
- b) At the time of creation only
- c) For the Advanced load evaluator only
- d) Only when the load evaluator is not being used

09. What are two types of content redirection?

(Choose two.)

- a) Client-to-server
- b) Server-to-client
- c) Client-to-content
- d) Application-to-server
- e) Content-to-application

10. In which two ways can an administrator prevent printer drivers from being installed?

(Choose two.)

- a) Use Windows Print Management.
- b) Enable the Printer driver mapping and compatibility policy.
- c) Use the Active Directory group policy to block driver installation.
- d) Configure the automatic installation of in-box printer drivers policy.

Answers to 1Y0-A20 Exam Questions:

Question: 01 Answer: d	Question: 02 Answer: c	Question: 03 Answer: c, e	Question: 04 Answer: a	Question: 05 Answer: a
Question: 06 Answer: a, d	Question: 07 Answer: d	Question: 08 Answer: a	Question: 09 Answer: a, b	Question: 10 Answer: c, d
